# APPLIED BUSINESS AND TECHNICAL SOLUTIONS

The company's main goal is to generate an income with respect to economic efficiency, entrepreneurship, viability and rules of economic account. Due to that, the company has made a decision to use Suncode's solution. Business process management system - Plus Workflow has ensured the support for Stalprodukt's employees in terms of purchase invoice acceptance, inquiries, and contract preparation and approval. As part of invoice management, transport services rendered to the company by external suppliers are also accounted for.

The implementation of the process has included integration with the ERP IFS system and with a dedicated system of shipping errands. Stalprodukt also uses the process of inquiries which concerns the whole cycle of document flow in the company, including technical consulting in production departments. The document scanning takes place in two locations. It is conducted with the usage of professional equipment delivered by Suncode.

Additionally, Stalprodukt's employees have taken part in business process modeling training.
